Prosoft and **AMS** Advanced Medical Services Announce an Agreement to Form a Global, Full-Service CRO

Philadelphia, PA / Mannheim, Germany — [October 2025] —

Prosoft Clinical and **AMS** Advanced Medical Services are pleased to announce that they have signed a definitive agreement to join forces and create a truly global, full-service Contract Research Organization (CRO). The agreement brings together two highly respected organizations with complementary strengths, shared values, and a unified vision for the future of clinical development.

A Global Platform for Growth

Under the agreement, **AMS**, via its US subsidiary, will make a significant initial investment in **Prosoft**, with additional investments planned as the companies move toward full integration. Prosoft will lead all **North American Operations**, delivering comprehensive clinical development services for the combined organization, while **AMS** will continue to expand its established presence across **Europe and the UK**.

By leveraging their combined capabilities in **biostatistics, data management, clinical operations, Health Technology Assessment (HTA), and advanced technology**, the unified company will provide seamless, end-to-end CRO services worldwide.

Innovation and Responsible AI

Together, AMS and Prosoft will advance digital innovation across clinical research. The partnership will integrate AMS's systems with Prosoft's proprietary EDC platform to deliver faster, smarter, and more efficient trial execution. The organizations will also continue expanding their use of Artificial Intelligence (AI)—implemented responsibly and with rigorous data protection—to further enhance efficiency, quality, and insights for sponsors.

Leadership Comments

“This merger reflects our shared commitment to excellence, innovation, and trust,” said **Dr. Dror Rom**, CEO of Prosoft Clinical. “By joining forces with **AMS**, we are combining two organizations that complement each other perfectly—scientifically, culturally, and operationally. Together, we are building a global CRO with the agility of a boutique firm and the capabilities of a multinational organization.”

“Our collaboration with Prosoft has already demonstrated that we achieve more together than individually,” said **Dr. Christian Carls**, Managing Director of **AMS**. “This partnership will continue as *The Team Company*, where customer focus comes naturally. It strengthens our global reach, enhances our service portfolio, and enables us to offer our clients around the world a truly integrated, technology-driven CRO experience. Through strategically early integrated HTA services that align pricing and reimbursement decisions, we help accelerate market access by demonstrating the value of innovation.”

About Prosoft Clinical

Prosoft Clinical is a full-service CRO based just outside of **Philadelphia, PA**, providing innovative biostatistics, data management, and clinical operations solutions to pharmaceutical and biotechnology clients worldwide.

Known for its proprietary technology platforms and data-driven approach, Prosoft helps sponsors accelerate development with scientific rigor and operational excellence.
